Your Home Deserves
A Stronger Roof

Wakefield Bridge®

STEEL SHINGLES

CLASS 4 IMPACT RATING | CLASS A FIRE RATING | HURRICANE-GRADE WIND PROTECTION

Classic Aesthetic Superior Performance

Wakefield Bridge® steel shingles are designed to resist high winds, hail, and burning embers. They will not rot, curl, crack, break, chip, peel or perforate under normal use and requires minimum maintenance.

With a **Class 4 Impact Rating**, **Class A Fire Rating**, and **Hurricane-Grade Wind Protection**, you can rest easy knowing your home is protected against everything Western Canadian weather can bring.

Built for Efficiency

Advanced Cool Roof® technology helps reduce energy use by keeping your home **15-20 degrees cooler**. Made from 100% recyclable steel and up to 60% lighter than traditional roofing, our shingles use fewer materials and reduce environmental impact—without sacrificing performance.

Premium Protection

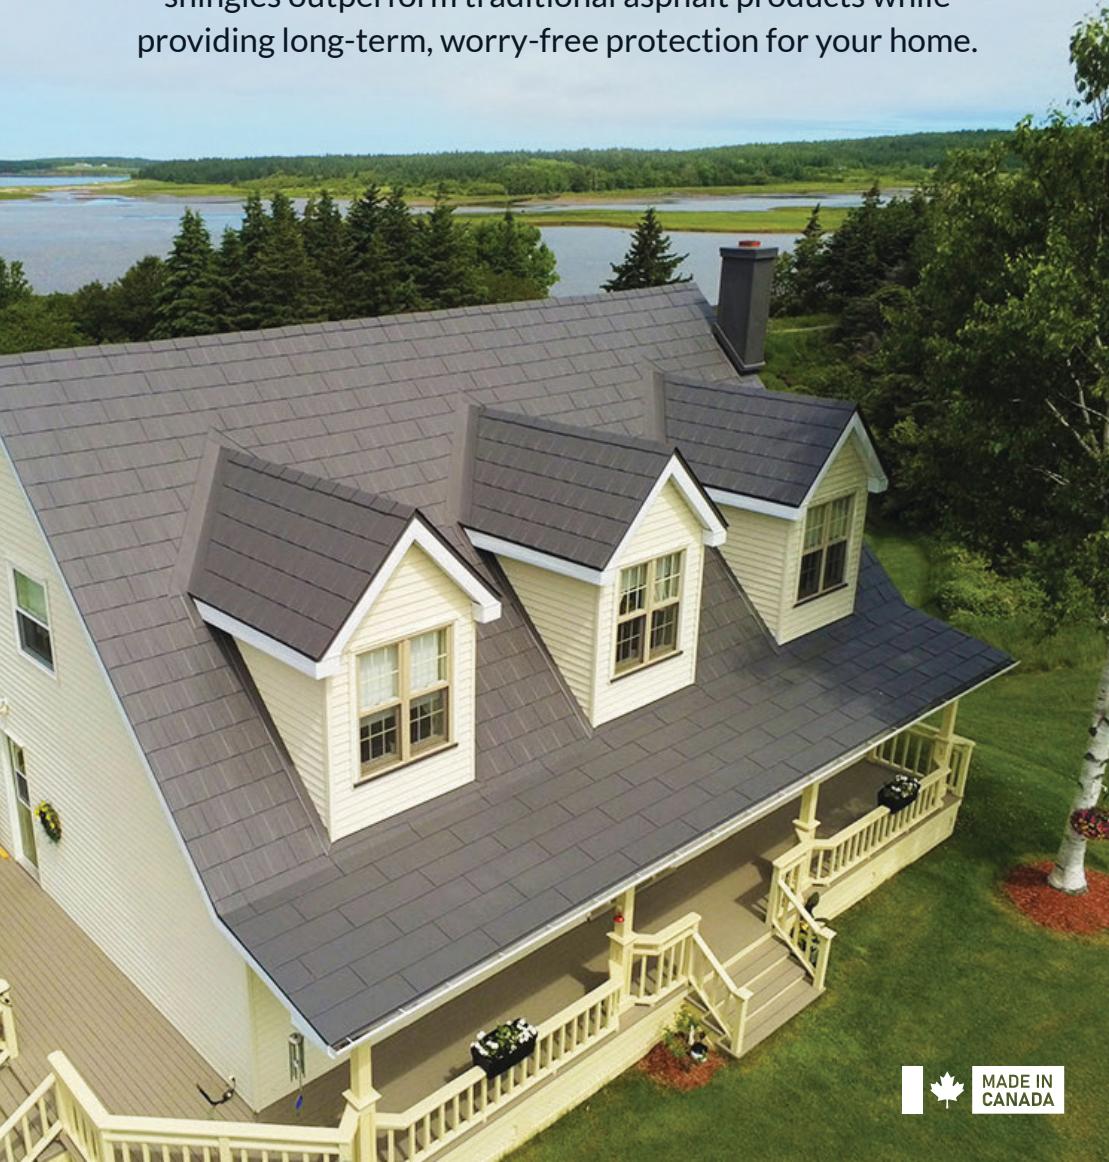

Wakefield Bridge® Steel Shingles are finished with a premium PVDF paint system featuring Kynar 500® resin, delivering long-lasting colour. Backed by a **50-year warranty**, this is a roof designed to protect your home for decades.

Smart, Beautiful & Long-Lasting

Premium Wakefield Bridge® steel shingles are designed to offer homeowners the classic aesthetic of traditional roofing with the superior performance and modern upgrade of steel.

Manufactured from 29-gauge Canadian-made steel, these shingles outperform traditional asphalt products while providing long-term, worry-free protection for your home.
